Yes, I wanted the table so I didn't have to re-create the wheel, that's all. I'm including all claims that intersect the polygons.

Subject: RE: Animas Table

To be clear, we will need access to all properties within the polygons. We are laying a grid across the entire area and collecting a composite for each sub polygon. No coordinates are available for the 30pt composites that will be collected within each sub polygon yet. Test pit locations will be determined in the field. The coordinates in Table 7.8 are for the water porewater, sed locations at the downstream edge of the polygons.

Give me a call if that isn't clear.

I actually need table 7.8 in excel. Could you send that to me?

We have access already for all locations that are listed in table 7.5-7.6, but not the polygons of fluvial sampling that are listed in maps 7.6-7.8, and on table 7.8.

Hi Dan and Liz,

Attached is the Excel version of the tables for the three Animas events.

Thanks,

Leslie

Subject: Animas Table

Hi

I am looking for the Excel version of Table A.7-6 from the final Animas SAP. Can someone please send that to me and 'cc Liz as well.

Thanks!

Dan
